shockingly poor historically and game mechanisms about as realistic as drughts or chequers would be. shockingly poor historically and game mechanisms about as realistic as drughts or chequers would be. So sad, this game is childs play with a small map generic units and absolutly no real campaign. its a bunch of unrelated battles that can be played individually. dont get this its a wast of your money even on sale. if you want a puzzle game, which this is go get yourself a rubix cube and have more variation. why bother to name the units when they are all exactly the same? i dont even mean there are different types of infantry, or that each nations is the different they all have the same factors except for some generic bonuses you give at the beginning of every battle to any random unit you want to, and there not earned there a set amount. a little more effort and this could have been a good game, but no thanks again for a half /// product that looks like somebody got board designing it half way through. unless you want a puzzle game dressed up in era uniforms closer to paper rock scissors then a real war game. if thats what you want have fun.. So sad, this game is childs play with a small map generic units and absolutly no real campaign. its a bunch of unrelated battles that can be played individually. dont get this its a wast of your money even on sale. if you want a puzzle game, which this is go get yourself a rubix cube and have more variation. why bother to name the units when they are all exactly the same? i dont even mean there are different types of infantry, or that each nations is the different they all have the same factors except for some generic bonuses you give at the beginning of every battle to any random unit you want to, and there not earned there a set amount. a little more effort and this could have been a good game, but no thanks again for a half /// product that looks like somebody got board designing it half way through. unless you want a puzzle game dressed up in era uniforms closer to paper rock scissors then a real war game. if thats what you want have fun.. The game mechanics of course are more like panzer corps than SSI's Battles of Napoleon, - the most irksome is probably that only one unit can occupy a square, even though a square itself can be quite large on the battlefield - so its some level of abstraction one must expect with a game like this. I recommend this one nevertheless for those who like all things napoleonic and dont mind it when the game is at best bearing a napoleonic flavour rather than being historically accurate.. wow what a disapointment this game has terrible grahicsfor 20 dollars game is not worth it i have a good grahics card game plays like 2d grahics real small maps and units you can hardly tell what side purchased this game and asked for refund after 20 min of play game is horrible. Really nice to have a good turn based strategy set in the era. I am really enjoying it so far.. wow what a disapointment this game has terrible grahicsfor 20 dollars game is not worth it i have a good grahics card game plays like 2d grahics real small maps and units you can hardly tell what side purchased this game and asked for refund after 20 min of play game is horrible. Really like this game. Ok, it's a theme I enjoy so I'm gonna be interested from the get go . but it's fun. It's a challenge and you can try out a range of strategies which feel like you have a sense of controlling the action. It's not a realistic simulation, it's not even a semi-accurate simulation but it is a good game. If you like the theme or the genre - give it a go.
